Vikram Singh

Senior Flutter Developer

singh.vkrm9079@gmail.com | +91 90798 67473 | Delhi, India | itsallabout2219.github.io/portfolio

Mobile developer with 6+ years of experience, growing from native Android to Flutter and now architecting cross-platform apps for mobile and web. Has shipped production apps used by thousands of people across field sales, HR, B2B commerce, EV and service booking, and owns releases end to end on Google Play and the App Store.

EXPERIENCE

Jun 2025 – Present

Flutter Developer

Blackbull Technosoft, Noida

- Own the full app development lifecycle, from architecture and development to testing and production release on Google Play and the App Store.
- Build Flutter web applications alongside Android and iOS apps from one codebase, using BLoC state management and REST integrations.
- Coordinate backend developers and a tester to deliver features and store releases on Android and iOS.

Aug 2024 – Mar 2025

Flutter Developer

FSL Software Technologies, Noida

- Took on the migration of the native Sales Mantra CRM app to Flutter, replacing separate platform builds with one codebase for Android and iOS.
- Extended the app with new features and critical fixes, and published updates to Google Play and the App Store.

Nov 2023 – Jul 2024

Flutter Developer

PageTraffic Web Tech, Noida

- Built Flutter/Dart apps with the BLoC pattern, moving to structured state management for Android and iOS.
- Integrated the WooCommerce API to sync data between the mobile apps and existing databases.

Feb 2022 – Nov 2023

Flutter and Android Developer

Triad Technologies, New Delhi

- Owned multi-platform apps end to end, from design and build to deployment and maintenance, in Flutter and native Android.
- Integrated RESTful services with Volley and the Flutter http package.
- Resolved bugs, design-pattern problems and project issues across multiple apps.

Jun 2020 – Feb 2022

Android Developer

Techoxa Technologies, Jaipur

- Helped re-architect the baseline Android app with modern components and Material Design.
- Contributed UI/UX designs focused on a more engaging user experience.

Oct 2019 – Mar 2020

Android Developer Intern

Dzone Hub, Jaipur

- Started out writing clean, modular Java and XML code within the Android SDK.
- Tested app compatibility across multiple devices.

SELECTED PROJECTS

Addes

Retail execution suite with role-based apps for area managers, site managers, visual merchandisers, retailers and executives, covering store visits, sales tracking, beat planning and demo-unit audits, in use by thousands of field and retail users.

ReDi 2.0 (RM and BM)

Dual-app B2B distributor marketplace with order punching, order tracking, geo-tagged beat marking and sales dashboards, in use by over a thousand sales and distributor users.

DaKinTo

Service-booking marketplace on web and mobile. Customers find providers, book slots instantly, get deals and pay securely. Merchants manage bookings, promotions and invoicing.

AE Recharge

EV charging app to find nearby chargers by connector type and speed, check live availability, reserve slots, start and stop sessions, and review charging history.

Sales Mantra CRM

CRM with mobile apps that give sales teams and management a real-time view of the business: contact and follow-up history, sales projection and funnel reports, alerts and reminders, and AMC profitability reports. Rebuilt in Flutter for Android and iOS.

Acro Paints Trade Partner and Teamworx

B2B dealer portal for inventory ordering, ledger viewing and coupon redemption, plus the Teamworx app. Both are in use by thousands of people.

Attamate

HR app for employee details, geofenced attendance tracking and leave management.

VMX Nuvoco and GeoCam

VMX Nuvoco is a project tool for site tracking, deployment status and cost monitoring, used by thousands of people. GeoCam is a site-survey app with geotagged photos and marker overlays.
